DETAILED ACTION

1. This is in response to applicant's amendment filed June 22, 2004 in which claims 7 and 18 are canceled; claims 1-6, 8-17, 19-52 are pending.

Allowable Subject Matter

2. After further search and thorough examination the present application and in view of applicant's remarks, Claims 1-6, 8-17, 19-52 are found to be in condition for allowance.

The following is an examiner's statement of reasons for allowance: the prior art (Boudreaux US 6,466,556) teaches a method of controlling handover of real-time packet data and serving wireless gateway are synchronized for relocation and the drift wireless gateway is then utilized as the new serving wireless gateway, see abstract.

On the other hand, claim 1 of the present application specifically teaches after the relocation the radio access-bearer for the service is linked by the second radio network controller to a same transport channel as was utilized by the first radio network controller for the service prior to the relocation. These limitations, in conjunction with other limitations, have not been disclosed, taught or made obvious over the prior art of record.

Claim 32, of the present application specifically teaches the relocation procedure signals to the second radio network controller information for linking a transport channel utilized for the service with a radio access bearer for service by including a transport channel identifier and a radio access bearer identifier in both a relocation required

message and a relocation request message. These limitations, in conjunction with other limitations, have not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
